

Disciplined, validated, deployed on your stack — not ours. You own the code, the data, and every parameter.

WHAT WE BUILD

Production-grade algorithmic trading infrastructure for sophisticated investors, family offices, and small RIAs. The systems we deliver are backtest-first, risk-disciplined, and fully transparent: no opaque alpha boxes, no SaaS lock-in, no overnight promises. Every promotion from paper to live is gated by mechanical walk-forward validation against your strategy and your universe.

- **Broker integration** — Alpaca and Interactive Brokers (paper + live), atomic bracket orders, options support
- **Market data** — real chains + Greeks, earnings calendar, dynamic momentum scanner across ~4,500 tradeable US equities
- **Risk discipline** — CVaR daily-loss breaker, portfolio Greeks limits, concentration caps, atomic stop/target brackets
- **Validation** — walk-forward harness with documented promotion gates (no live trading without passing them)
- **Dashboard** — auth-gated portal at your domain, real-time equity curve, vs-SPY benchmark, full trade journal

SCOPE OF WORK (4–6 WEEKS)

PHASE	DELIVERABLE	DURATION
Discovery	Universe definition, risk parameter calibration, strategy scoping document	Week 1
Implementation	Custom strategy code, broker integration, full test suite (100+ tests)	Week 2–3
Validation	Walk-forward backtest report with explicit OOS Sharpe / max DD / regime analysis	Week 3–4
Deployment	Live dashboard at your domain, paper-trading harness, operational runbook	Week 4–5
Onboarding	Live promotion (only if validation gates pass), 90-day support window	Week 5–6+

DELIVERABLES

- **Source code** — yours to keep; no licensing fees
- **Deployed dashboard** at your custom domain
- **Walk-forward validation report** with documented gates
- **Operational runbook** for your team
- **90 days of post-deployment support** included
- **Promotion gate** — system stays paper-only until OOS Sharpe > 0.7 and max DD < 25%

ENGAGEMENT & PRICING

Discovery + Scoping	\$2,500
Custom Deployment	\$25k–\$45k
Ongoing Maintenance (optional)	\$1,500–\$3,000/mo
Custom Strategy Development	\$400/hr

Deployment range depends on universe size, strategy complexity, and dashboard customization. Discovery fixes scope and price before any build work begins.

What we do not do. This engagement is software development and infrastructure consulting — *not* investment advice. We do not recommend specific securities, promise returns of any kind, trade on your behalf, or provide tax or legal advice. The client remains solely responsible for trading decisions, strategy parameter choices, and the regulatory implications of operating an automated trading system. Past performance is not indicative of future results.
